Enhance your home with a

As a family business we have manufactured garages for over 50 years. This means we have a vast wealth of knowledge and we are constantly updating our range as new products and materials come onto the market. Top quality components are used throughout our range of buildings, fully finished timberwork, thicker concrete panels, extra purlins and stronger roof trusses all give Clayton Garages the edge over the competition. Combined with our 10 year structural warranty and over 50 years continuous service, give the customer peace of mind when choosing a Clayton garage.

It is not possible to show every combination and variation of building in one brochure. If your specific requirements are not shown here, either visit our website or speak to one of our sales team who will be happy to quote for your exact specification.

<i>Walls</i>	Concrete sections, machine vibrated and reinforced steel bars for built in strength, full height for rigidity. Full size Canterbury spar finish for durability in all weathers. Other spar finishes are available, or plain panels can be specified for on site rendering and painting.
<i>Roof</i>	Flat roof, timber purlins @ 2'-0" centres. For extra strength. Apex roof, timber purlins on timber or fabricated steel trusses.
<i>Roof sheets</i>	Eternit fibre cement corrugated sheeting or Galvanised Steel Plastic coated box profile full length sheets available with underlining or insulation to help reduce condensation.
<i>Doors</i>	Hormann Fully Retractable Vertical Ribbed up and over doors in steel frames are fitted as Standard on all our Garages. Sectional Overhead or Roller Shutter doors are available as optional extras. All doors can be fitted with Electric Remote Control Operators (subject to a suitable power supply being available).
